

Why worry about the investment If the return is within 6 months

In these financial unstable times, profits are no longer obvious as before. The industry is in a constant search to cut costs and every effort is taken in consideration. For the majority of companies this becomes an un-solving problem in a time where innovation is a necessity.

IPCO Power can help you to reverse this negative impact.

With the state of the art Fuel Improvement Device we can provide you the solution to innovate and boost results.

- Fuel efficiency through
 - o Sludge reduction
 - o NOx reduction
 - o Soot reduction
 - o Black smoke reduction
 - o andfuel improvement

Fuel efficiency means money saving.

Up to 2% of fuel efficiency is money saving

But also tangible reduction in maintenance is a logical consequence of this.

So.....

If the return is within 6 months Why worry about the investment
